

TraumaTransfer™

TraumaTransfer™ is a product that has been well-proven in Sweden and Denmark. Now we have the pleasure to offer this high-quality trauma mattress in England.

What is TraumaTransfer™?

- TraumaTransfer™ is designed for fast and safe immobilisation and the transfer of trauma-patients.

What are the advantages of TraumaTransfer™?

- TraumaTransfer™ allows you to eliminate several cumbersome and potentially dangerous lifts of the trauma patient. Therefore it is safer and more comfortable for the patient and easier for the staff.
- TraumaTransfer™ is optimized for x-ray and CT and leaves no artefacts in the pictures.
- Due to the pressure-relieving material, the risk for pressure-injuries is minimized.

For whom should it be used?

- All patients suspected of major trauma, in need of x-ray or CT should be placed on the TraumaTransfer™.
- Patients with cerebral aneurysm or AVM will also benefit from being placed on the TraumaTransfer™.
